The Inside Story

## **Coleman Technologies**

help's Wolf And Company  
Chartered Accountant's with all  
their Complex Technology needs.

[www.colemantechologies.com](http://www.colemantechologies.com)

## Darren and the team at Coleman Technologies installed and implemented the following for Wolf and Company:

- A VPN (virtual private network) so they could securely access their data over the Internet.
- Remote access between their two office locations.
- Both onsite and cloud backups to ensure business continuity and disaster recovery.
- Proactive remote monitoring, asset tracking, automated maintenance, and managed antivirus.

Bryan Locke, a Partner at Wolf and Company Chartered Accountants, tells us: "Coleman Technologies develops and maintains all of our computers, network and related services. They are on call 24/7 —Very rare in this day and age. The team at Coleman Technologies provides excellent service, and are very knowledgeable."

Business continuity and data recovery are extremely important according to Bryan: "Our information is sensitive and confidential, so we require the best in these related services, and have found that with Coleman Technologies. They have also networked all of our personal computers with those in the office.

***We recommend Coleman Technologies to others, and they too have been very satisfied with their services. Coleman Technologies is first class!"***
